"We Build Advanced Occlusal Concepts Into Everything We Do!"

We've grown into an O.I.C.S. Laboratory!

At **Klausz Dental Laboratories**, we are committed to providing our clients with a full range of services, restorations, and appliances to meet all aspects of clinical dentistry. To meet your expectations we have grown into an **Occlusal-Implant-Cosmetic-Sleep (O.I.C.S.) Specialty Laboratory** and we have solidified our position as a leader in these fields through various certifications.

With over 50 years of experience in the dental technology field, we build advanced occlusal concepts into every restoration and appliance we custom fabricate. It's with a greater understanding of how teeth, muscles and joints work together that we can create restorations that not only look lifelike and aesthetic, but can last longer and function better. Allow us to apply the knowledge we've accumulated into your next restoration or appliance. See why we've become an **O.I.C.S. Specialty Laboratory**.

Communication is the Key to Any Successful Relationship

How and when you choose to communicate with us is very important. We would like to ensure that you have as many ways as possible to let us know your thoughts about the types of restorations and services we provide.

We strive to make client satisfaction our number one priority, and we appreciate the opportunity our clients provide us to demonstrate our abilities.

We hope our social media presence will be an enhancement to our print newsletter and our e-newsletter and provide a more rapid way to share information.

Ronald Klausz, R.D.T.

Be sure to share your thoughts, ideas, and cases with us.

Looking to social media to enhance communication is just another way we're working harder and smarter for your practice!

Multi-Layered Full Contour Zirconia Restorations Strength and Beauty Come Together

Regardless of the clinical situation, today's patients demand an aesthetic restorative outcome that matches or even looks better than their natural teeth, all the while exhibiting great strength. Traditionally, this demand has been met by the use of porcelain fused to metal restorations. However, many patients present with signs of bruxism or exhibit worn dentition that does not allow for the use of traditional ceramic restorative options. In the past, the solution for the most challenging of cases was full metal or metal occlusal restorations.

With the advent of dental milling came the first generation of Full Contour Zirconia Restorations. Original zirconia materials were extremely hard and opaque, and were difficult to match the shade and translucency of natural teeth.

Today's solution is Multi-Layered Full Contour Zirconia Restorations

- Low Wear to Opposing Dentition
- Higher Translucency than Traditional Zirconia
- Pre-Shaded Material Eliminates White Spots After Clinical Adjustments
- Conventional Cementation Indicated
- Extremely Strong and Resistant to Fracture/Chipping
- Conservative Preparations
 - 0.5mm minimum thickness
 - Feather edge preparations

Multi-Layered Zirconia brings beautiful aesthetics to the strength of full contour zirconia

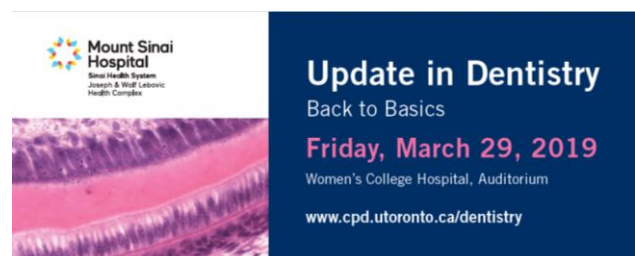

"Bringing you the latest in material science is just another way we're working harder and smarter for your practice!"

Anterior Aesthetics by Klausz Dental Labs

Case Courtesy of Dr. Abdullah Alawady, Toronto, Ontario

"I saw this patient for a recall this week after I cemented crowns on teeth 11 and 21 early last year. The delivery appointment went flawlessly with absolutely no adjustments required. The margins were undetectable with the explorer and the interproximal contacts were perfect! The patient is ecstatic with the results and couldn't be any happier and so am I! I am extremely pleased with the quality of work Klausz Labs have been doing for me and I am looking forward to continue working with you in the future. Please extend my gratitude to all the staff and lab technicians."

-Dr. Abdullah Alawady

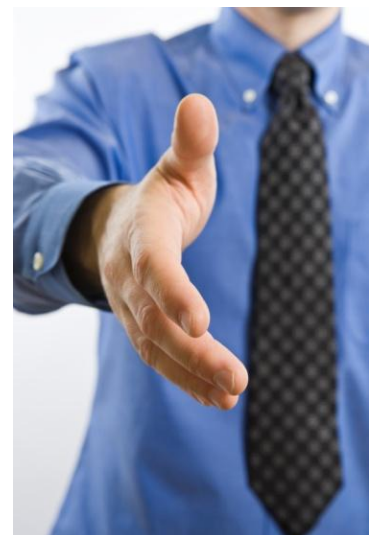

The patient had been unhappy with his smile for years, and was particularly concerned with the appearance of his central incisors. He presented with stained, chipped, and asymmetrical central incisors and wanted an aesthetic improvement. He has had old bonding on these teeth that kept on chipping and he was tired of having it replaced frequently and was looking for a more permanent solution. The teeth were vital, so minimal reduction was a must. After consulting the lab, we chose zirconia based, porcelain layered crowns. These types of restoration can be made fairly thin and yet will mask out most underlying discoloured tooth structure. The final result was aesthetic, functional, and strong and the patient was ecstatic!

Our Doors are Always Open

We pride ourselves in the high quality and care we provide our clients and their patients. There's no better sign that we are serving you well than the number of new dentist referrals that contact our laboratory. Referrals and word of mouth are the number one source of new clients for us. When you give us a good reference, we won't let you down! A vibrant client base helps our laboratory grow and expand so that we can continue to offer the very best in dental laboratory materials and services.

So, if you're wondering whether or not we accept new clients - the answer is YES. Not only do we accept them, we encourage them. There's no higher compliment for us than to be given the privilege of meeting and serving the needs of your colleagues and friends.

As always, we are striving to work harder and smarter for you and your colleague's practices.

Digital Dentistry at Klausz Dental Laboratories

We accept STL files from all of the most popular scanners

As technology is constantly changing, our laboratory is evolving to meet the changing needs of our clients. This is how we've been able to build and maintain relationships with our clients for over fifty years.

We are proud to announce that we've become a Cadent iTero Partner Laboratory, a Lava Chairside Oral Scanner (C.O.S.) Affiliate Laboratory, a Trios -3Shape Laboratory, and a Carestream Registered Laboratory. And the list keeps growing!

We can accept all STL files that can be captured in your office.

Digital files sent to the lab allow us to create 3D printed models and fabricate your restorations and appliances to the highest quality possible with precision and accuracy.

We can accept digital scans from clients who choose to go digital.

If you're looking to invest in the future of digital dentistry, be sure to consult with your lab for insights and guidance.

Another First for Klausz Dental Laboratories

We are proud to announce that we're the first dental laboratory in Canada to be granted access to the Canadian Dental Association's SecureSend Portal.

Send Information in Seconds  private email

CDA SecureSend is a simple-to-use system that allows dentists to exchange patient documents in a secure fashion. You can now send us your patient notes, designs, pictures, and digital scans knowing that you are protecting your patient's right to privacy.

Keep Patient Data Confidential  private email

Unlike email, CDA SecureSend meets your legal obligation to safeguard the confidentiality of patient data when sending patient information electronically.

It's as simple and as quick as sending an email  private email

We're always looking for ways to improve on the way we communicate with our clients. Listening to your concerns and finding solutions to meet your needs is at the heart of what we do. So when we say, "Working Harder And Smarter For Your Practice!", we mean that we're finding solutions for each of our client's specific needs and challenges, whatever they may be. Communication is the key!
